

PHILIP SIMPSON

Software Engineer | .NET, Angular, Azure

SUMMARY

Software Engineer with experience designing, building, and maintaining production web and mobile applications using C#, .NET, Angular, Ionic, SQL Server, and Azure. Proven ability to deliver end-to-end features across frontend, backend, and database layers, troubleshoot complex production issues, and mentor developers. Experienced leveraging GitHub Copilot and AI-assisted development tools to accelerate delivery and improve code quality.

WORK EXPERIENCE

Software Developer @ Rodeo Logistics | Austin, TX

December 2023 — Present

Contributed to the development and ongoing maintenance of three production applications supporting rodeo organizations and competitors nationwide.

- Designed, developed, tested, and deployed dozens of full-stack solutions across Angular frontends, .NET APIs, SQL Server databases, and Ionic mobile applications.
- Optimized SQL Server queries and application workflows, reducing response times and resolving production bottlenecks.
- Participated in application architecture discussions and technical planning for new features and system enhancements.
- Utilized Azure services including App Services and Blob Storage to support application deployment and file management workflows.
- Mentored one junior developer through code reviews and onboarding guidance, accelerating their integration into the development workflow.

Tech Support Specialist @ COMBASE-USA | Las Vegas, NV

February 2023 — December 2023

Collaborated with team members to troubleshoot Windows and Linux-based operating systems as well as Java-based software (KoronaPOS) for merchants

- Resolving client and internal technical support tickets
- WordPress website content management
- Network troubleshooting using linux command line
- API & Integration troubleshooting via Postman
- Assisting development of a test pilot for adding a product to the database from the POS - [Repo](#)

FREELANCE EXPERIENCE

Fire & Ice Cream, LLC | Sonora, CA

May 2026 – Present | [Site](#) (In development)

Designed and built a full-stack business management platform from scratch for a sole proprietor in the food truck industry. Includes a public-facing website, cross-platform mobile app (Capacitor), and a private owner dashboard covering bookings, GPS route tracking, inventory/menu management, CRM, staff RBAC, invoice OCR, Square POS sync, and real-time customer chat via SignalR. Deployed to Azure.

TECHNICAL SKILLS

Languages

C#
JavaScript
TypeScript
SQL
HTML
CSS

Frameworks & Libraries

.NET
ASP.NET Core
Angular
Ionic
Entity Framework
Node.js
Express
React
Capacitor
RxJS
JWT
SignalR
Facebook/Instagram Graph API
Leaflet
Square API
APNs

Databases

SQL Server
T-SQL
MySQL
MongoDB
Firebase

Cloud & DevOps

Azure
Azure App Services
Azure Blob Storage
Azure Data Studio
Azure Doc Intelligence
GitHub Actions

Development Tools

Git
GitHub
GitHub Copilot
ChatGPT

- Architected and delivered a full-stack SaaS platform (Angular 20 + .NET 8 Clean Architecture) with 25+ API endpoints, 24 database migrations, and 4 lazy-loaded Angular feature modules — designed to scale from solo owner to multi-staff operation with role-based access control.
- Integrated 5 external APIs in a single production system: Square (OAuth 2.0 + Catalog sync + HMAC webhook verification), Facebook/Instagram Graph API, Azure Document Intelligence (invoice OCR), Apple Push Notifications (APNs), and Google Calendar two-way sync.
- Built a real-time GPS truck tracking system with live Leaflet map, proximity push notifications, and SignalR customer chat — deployed as a native iOS/Android app via Capacitor from a single Angular codebase.
